- ✓ Government Documents

Oblique hanging compartments are the "top of the line" solution to the problems of document management. They are the only hanging files in the world which carry a manufacturer's Ten Year Warranty. Each compartment is rated to hold 20-25 pounds in weight. Capacity is based on the size of materials. With over 80 styles and sizes available from 7 1/2" x 12" up to 24" x 40" there is an Oblique compartment perfectly suited to meet your needs.

Oblique handles all your loose documents, soft bound and paper-based information management needs. All Oblique Compartments are PH neutral to keep documents safe. Flexible v-base compartments cradle contents, protecting valuable materials without wasting extra space. Box-base compartments can be selected to exactly suit your needs from 1" to 4.5" capacities. Color-Keyed Indexing allows you to design your own easy-to-use system. Code files using alpha, numeric, or mixed indexing criterion.

Oblique's expansion capabilities can accommodate materials from 1 sheet of paper to almost 3 inches or more. Three levels of indexing and 13 colors of Guides and labels helps customers create a custom designed indexing system that will provide fast and efficient file retrieval. Color-Keyed Indexing™ is easy to install and maintain. Changing labels is simple and our "snap-together" compartments can be removed or added with ease. Oblique's retrofit capability allows you to update to a new system without changing existing "hardware." Lift out shelves and drop in Oblique's rail assemblies. Our 10-Year warranty will assure you that this system will last for many years to come, unlike technology hardware purchases.
